PROFILE

I believe there's no need for extra talk—my apps speak for me, if they can convince you, then so can I.

note: all apps has codebase on github, but may all of them not be live !

WORK EXPERIENCE

AhvazTalla (NextShop)
Ahvaz, Iran

Freelancer - Fullstack developer

- this website is an example of Jewellry Shop using NextShop project created by next.js, Tailwindcss, docker, nginx
- i exprienced a lot of chanllanges and by solving them learned a lot of things like :
  - realtime price in user cart base on global price from api
  - next.js layout benefits && SSR
  - creating infinit scroll
  - creating admin panel
  - depeloyment by docker compose and shell script
    and so much other amazing things...

NextBlog
Ahvaz, Iran

Freelancer - Fullstack developer

- this project for me had another types of chalanges like :
  - comments system, with unlimited replys!
  - also it had infinit scroll
  - stream videos efficenty chunk chunk, so an client with low end internet speed also be able to watch videos
  - designing prisma schema to fit needs

  → due to maintance it is currently offline but soon it back

NextResume (Personal website)
Ahvaz, Iran

Freelancer - Fullstack developer

- In this project i worked on new two new challanges :
- → multilingual (english, persian, Chines)
- → Dark and Light system
- → https://alirezaghavabesh.vercel.app

fastitem (an practice to clone fastitem.ir)
Ahvaz, Iran
